**SIP - SETTING KONEKSI**

Server Name

Database

User

Password

**CANCEL** **SAVE**

Keterangan :

1. Cara Mendapatkan Server Name (COPAS Server name saat tampilan login sql muncul )

**Connect to Server**

Microsoft SQL Server 2014

Server type: Database Engine

Server name: USER

Authentication: Windows Authentication

User name: user\Arif TBN

Password:

☐ Remember password

**Connect** **Cancel** **Help** **Options >>**

2. Isi database dengan **sip**
3. Isi user dengan **sa**
4. Isi password sesuai dengan saat anda setting SQL
5. Lalu SAVE

4. SETELAH SETTING DATABASE, LALU PILIH **CREATE DATABASE**

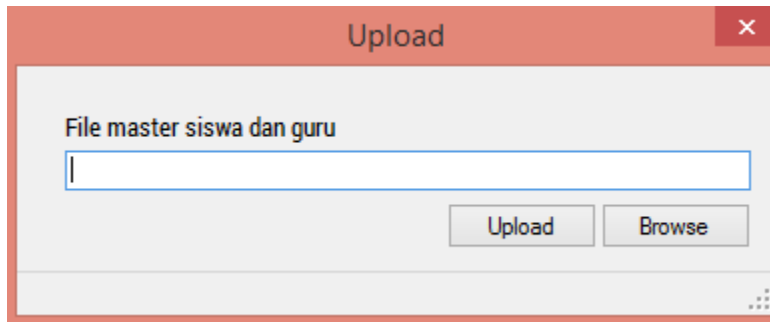

The screenshot displays a software interface with three sections labeled 'ABSEN 2', 'ABSEN 4', and 'ABSEN 6'. Each section contains a large checkmark icon and the text 'Clock In Name'. A modal dialog box titled 'BUTA DATABASE BARU' (New Database) is centered on the screen, featuring a 'NEW DB' button. In the background, a table with columns 'NO' and 'NAME' is partially visible.

KLIK NEW DB MAKA SISTEM AKAN SECARA OTOMATIS MEMBUAT DATABASE PADA SQL SERVER.

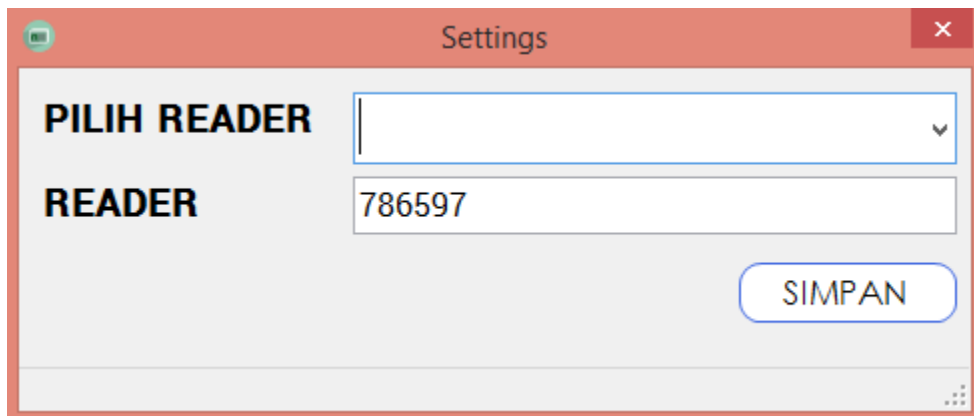

5. LALU PILIH DAN ISI MENU **PROFIL SEKOLAH**

The screenshot shows a 'PROFIL SEKOLAH' (School Profile) form. It includes two input fields: 'KODE SEKOLAH' (School Code) and 'NAMA SEKOLAH' (School Name). A 'Simpan' (Save) button is located at the bottom right of the form.

## 6. LALU KLIK **DOWNLOAD MASTER**

## 7. TERAKHIR **SETTINGS DEVICE**

Keterangan :

- a. Program support untuk 6 device reader RFID
- b. Cara settingnya :
  - 1.a. Colokan reader pada port usb (external/internal) pc
  - 2.b. Pilih Reader, lalu Scan kan kartu pada reader yg akan di settings, setelah muncul ID di Kolom Reader, Klik **simpan**
  - 3.c. Untuk setting device yg lainnya, sama dengan point di atas.

c. **CATATAN, KETIKA PORT USB DI LEPAS, MAKA SECARA OTOMATIS ID READER KEHAPUS, MAKA LAKUKAN HAL YG SAMA DI ATAS UNTUK SETTING ULANG DEVICE**

8. TERAKHIR RESTART PROGRAM SIP DENGAN CARA CLOSE, LALU OPEN KEMBALI, DAN PROGRAM SIP SIAP DIGUNAKAN
